

OPTICS

WHDA attorneys have broad expertise in protecting the intellectual property rights in matters related to optics. Clients benefit from the wide array of optical concepts our team has worked to protect. We apply extensive academic and practical knowledge in technologies including:

- › Image reproduction systems
- › Electro-optical circuit boards and connectors
- › Digital cameras
- › Video projection systems
- › Microscopy
- › Endoscopes
- › Touchscreen devices
- › Optical and magneto-optical storage systems
- › Electron beam devices
- › Optical fibers
- › Solid state imagers
